

ENDO VET

R E F E R R A L S

Introduction:

At EndoVet Referrals, we specialise in minimally invasive diagnostics and treatment, working in close collaboration with referring veterinary practices to provide cutting-edge care for their patients.

Benefits for Referring Practices

-  Expanded Service Offering – Provide your clients access to specialist procedures without the need for invasive surgery.
-  Minimally Invasive Approach – Reduced recovery times and less stress for pets, leading to higher client satisfaction.
-  Seamless Referral Process – We work as an extension of your team, keeping you informed at every step.
-  Efficient Scheduling & Reporting – Fast turnaround times with detailed reports sent back promptly.
-  No Need for Costly Equipment – Offer advanced procedures without investing in specialist tools or training.

How We Work With You

-  **Simple Referral Process** – Contact us via phone, email or our online form.
-  **Collaborative Case Management** – We consult with you pre- and post-procedure.
-  **Fast & Efficient Care** – Prompt scheduling and detailed reports.
-  **Follow Up Support** – We remain available for any ongoing case discussions.
-  **Based in Brownhills, we accept referrals from across the UK.**

Referral Terms & Conditions

- **Commitment to Ethical Referrals:** We operate as a dedicated referral-only service and will not register any referred clients as our own.
- **6-Month Client Protection Guarantee:** Any pet referred to us remains under the primary care of the referring practice for at least six months following their treatment with us.
- **Seamless Communication:** All medical records and follow-up recommendations will be provided to the referring practice, ensuring continuity of care.
- **Direct Client Contact Only for Procedure Purposes:** While we may liaise with pet owners for procedural logistics, all ongoing veterinary care decisions remain with the referring practice.

We value our partnerships and are committed to maintaining a trusted and collaborative referral relationship with all veterinary practices.
